Qi-Mag® Feng Shui-project: New development WIBERG-Centre

Goal of the consultation

Strengthening the health and vitality of the employees by means of environmental and geo-economic aspects, all relevant Feng Shui systems and working with the geomantic conditions and influences.

„In this new development lies the future of our employees, the company and our customers“, says the spicery-manufacturer WIBERG GmbH in Freilassing about the new manufacture building. Birgitta Kumm assisted the project, whose construction cost 37 million euros, as assisting construction manager and Qi-Mag Feng Shui Consultant. The company WIBERG is enthusiastic: „The overall architectural effect, the work place design and also the new WIBERG canteen are very much appreciated and praised by the employees, the customers and the official authorities.“

Opening in April 2008 after four years construction time. In the picture (from left): managing engineer Adrian Wurmer, Qi-Mag Consultant Birgitta Kumm, executive director Michael Stelzer.

Outside facade and outdoor facilities were designed after Qi-Mag Feng Shui criterias, a site harmonization has been done.

The choice of colour follows the five elements of the Feng Shui.

For the base flagstone, the so-called 'flower of life' was chosen.
